Item 97 (g) of the preliminary list*
General and complete disarmament: transparency in armaments

United Nations Register of Conventional Arms

Report of the Secretary-General

Summary

The present report, which is submitted pursuant to General Assembly resolution 68/43, contains information received from Member States on the export and import of conventional arms covered by the United Nations Register of Conventional Arms, including "nil reports", as well as additional background information on military holdings, procurement through national production and international transfers of small arms and light weapons for the calendar year 2015. As at the date of submission of the present report, the Secretary-General had received reports from 27 Governments.

I. Introduction

1. The present report is the twenty-fourth consolidated report on the United Nations Register of Conventional Arms issued by the Secretary-General since the establishment of the Register.[1] The General Assembly, in paragraphs 3, 4, 5 and 6 (a) of resolution 68/43, called upon Member States to provide their data and information on international transfers of major conventional arms covered by the Register, including "nil reports" and additional background information, on an annual basis.

2. On 4 March 2016 the Secretariat sent a note verbale to Member States requesting them to submit their reports no later than 31 May 2016. Reminders were sent on 9 June 2016. The replies received are reproduced in sections II to IV and in the annex below. Any further national reports and additional information received from Governments will be issued as addenda to the present report.

3. The percentage of Member States using the online reporting tool in filing their national reports with the Register has been rising since its introduction, from 20 per cent in 2012, to 46 per cent in 2015.

4. The originals of the submissions by Member States are available to Governments from the Office for Disarmament Affairs.[2] The annual reports and other relevant information are available from the website of the Register.[3]

[1] The first 23 reports were issued under the following symbols: A/48/344 and Corr.1-3 and Add.1-3; A/49/352 and Corr.1-2 and Add.1-4; A/50/547 and Corr.1 and Add.1-4; A/51/300 and Add.1-5; A/52/312 and Corr.1-2 and Add.1-4; A/53/334 and Corr.1-2 and Add.1-2; A/54/226 and Corr.1 and Add.1-6; A/55/299 and Corr.1 and Add.1-6; A/56/257 and Corr.1 and Add.1-2; A/57/221 and Corr.1-2 and Add.1-3; A/58/203 and Corr.1-2 and Add.1-2; A/59/193 and Corr.1-2 and Add.1-2; A/60/160 and Corr.1-2 and Add.1-3; A/61/159 and Corr.1-2 and Add.1-3; A/62/170 and Add.1-3; A/63/120 and Add.1-3; A/64/135 and Add.1-3; A/65/133 and Add.1-5; A/66/127 and Corr.1-2; A/67/212 and Corr.1-2 and Add.1-2; and A/68/138 and Add.1; A/69/124 and Add.1; and A/70/168 and Add.1.

Views received from Governments

Cuba

[Original: Spanish]

Transparency in armaments can help to strengthen trust and security among States if it conforms strictly to the principles enshrined in the Charter of the United Nations, including those of equal rights, self-determination of peoples, right to self-defence, respect for sovereignty, territorial integrity and non-interference in the internal affairs of States.

Measures to improve such transparency must be taken on the initiative of the States concerned and on a voluntary basis. Because they are voluntary in nature, such measures cannot be imposed. States must decide freely, with equal rights and in exercise of their sovereignty, whether to participate in and the scope of such measures.

Cuba recognizes the United Nations Register of Conventional Arms as a confidence-building measure. The Register should include weapons of mass destruction. The inclusion of only conventional weapons is insufficient and discriminatory.

To show its commitment to transparency in armaments, Cuba responds annually to the requests for State contributions to a large number of General Assembly resolutions related to disarmament, international security and arms control. It has also submitted reports to the Register of Conventional Arms, and Cuban experts participated in the groups of governmental experts on the Register in 1994, 1997, 2000 and 2013.

Japan

[Original: English]

Related policies: three principles on the transfer of defence equipment and technology

On 1 April 2014, the Government of Japan, in accordance with its National Security Strategy adopted on 17 December 2013, outlined a set of three new principles on the overseas transfer of defence equipment and technology to replace its three principles on arms exports and their related policy guidelines.

1. Intent of the new principles

Surrounded by an increasingly severe security environment, it has become essential for Japan to make more proactive efforts in line with the principle of international cooperation. Japan cannot secure its own peace and security by itself, and the international community expects Japan to play a more proactive role for peace and stability in the world, commensurate with its national capabilities. Against this backdrop, Japan will contribute even more proactively in securing peace, stability and prosperity for the international community while achieving its own security, as well as peace and stability in the Asia-Pacific region, as a proactive contributor to peace based on the principle of international cooperation. From the viewpoint of achieving the fundamental principle of national security by implementing concrete policies, the Government of Japan decided to review its existing policy guidelines on the overseas transfer of defence equipment and technology and set out clear principles to fit the new security environment by consolidating the policy guidelines comprehensively with consideration for past exemption measures while giving due consideration to the roles that the existing policy guidelines have played so far.

2. Main contents of the principles

While maintaining its basic philosophy as a peace-loving nation that conforms to the Charter of the United Nations and the course it has taken as a peace-loving nation, Japan will control the overseas transfer of defence equipment and technology based on the three principles on the transfer of defence equipment and technology. The main contents of the principles are as follows:

(a) First principle: clarification of cases where transfers are prohibited

The overseas transfer of defence equipment and technology will not be permitted when:

(i) The transfer violates obligations under treaties and other international agreements that Japan has concluded;

(ii) The transfer violates obligations under resolutions of the Security Council of the United Nations;

(iii) The defence equipment and technology is destined for a country that is party to a conflict and against which the Security Council of the United

Nations is taking measures to maintain or restore international peace and security in the event of an armed attack.

(b) *Second principle: limitation to cases where transfers may be permitted as well as strict examination and information disclosure*

In cases not falling under (a) above, transfers may be permitted under the following circumstances. Those cases will be examined strictly while ensuring transparency and involve situations where the transfer contributes:

(i) To the active promotion of peace contribution and international cooperation;

(ii) To Japan's security.

Significant cases that require especially careful consideration from the viewpoint of Japan's security will be examined by the National Security Council. The Government will disclose information on the cases deliberated by the National Security Council in accordance with the Act on Access to Information Held by Administrative Organs (Act No. 42 of 1999).

(c) *Third principle: ensuring appropriate control regarding extra-purpose use or transfer to third parties*

In cases satisfying the conditions of (b) above, the overseas transfer of defence equipment and technology will be permitted only in cases where appropriate control is ensured. More concretely, the Government of Japan will, in principle, oblige the Government of the recipient country to gain its prior consent regarding extra-purpose use and transfer to third parties. The Government of Japan will thus contribute even more actively to the peace and stability of the international community as a proactive contributor to peace based on the principle of international cooperation.

Under such a policy, it will play a proactive role in the area of controlling defence equipment and technology, as well as sensitive dual-use goods and technologies, to achieve the early entry into force of the Arms Trade Treaty and further strengthen international export control regimes.

Senegal

Original language: French
Background information provided: yes
National points of contact: yes

Calendar year: 2015
Date of submission: 31 May 2016

Senegal has no industrial arms production infrastructure. The conventional arms of the Senegalese defence and security forces are imported. In fact, arms included in the United Nations Register of Conventional Arms may be acquired only by the armed forces under a specific procedure to protect the integrity of the country. No other individual or legal entity is authorized to make transfers related to such arms.

The flow of conventional arms held by the Senegalese defence and security forces is therefore controlled. The situation with regard to small arms and light weapons not included in the Register of Conventional Arms, however, is very different.

A survey conducted in Senegal in 2009 on behalf of the National Commission to Combat the Proliferation and Illicit Circulation of Small Arms and Light Weapons confirmed the main trends in the circulation of such weapons in Senegal.

Circulation is widespread in the southern region of the country, in particular in Casamance (Ziguinchor, Kolda and Sédhiou). The low-intensity armed conflict linked to the pro-independence Casamance insurgency in which the region has been mired for more than thirty years has been a major historical factor in the illicit circulation of firearms and their parts, components and ammunition in that part of the country.

Illicit proliferation of arms has also developed in the north-east, from Mauritania, and along the Malian border and in the south-east, as a result of armed banditry, conflicts between farmers and herders relating to transhumance, and sociocultural factors in those livestock grazing areas, where bearing arms is perceived as a cultural practice.

Dakar and its suburbs are also considered areas of illicit trafficking in arms, which are used in acts of urban violence, although they have a higher number of people with a licence to possess or bear arms.

The increase in the number of hotspots in West Africa, where borders are porous and a war economy based on trafficking in arms and drugs has emerged, has contributed to the proliferation of arms, to the benefit of criminals who commit acts of banditry, such as robbery and cattle rustling, across borders.

The survey also showed that a sense of insecurity and ignorance of arms-related legislation are among the main reasons for the acquisition of arms. That would justify the need to step up the fight against transnational organized crime related to the illicit circulation of arms.

The Government of Senegal therefore gives a high priority to the fight against crime, which is facilitated considerably by the proliferation of small arms.

To eradicate this scourge and contribute to transparency in the regulation of arms transfers, the Senegalese Government participates in all the international,

regional and national processes related to arms control, including the Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects, the Arms Trade Treaty, the United Nations Convention against Transnational Organized Crime and its Firearms Protocol, the International Instrument to Enable States to Identify and Trace, in a Timely and Reliable Manner, Illicit Small Arms and Light Weapons, the work of groups of experts on munitions, and the Economic Community of West African States Convention on Small Arms and Light Weapons, Their Ammunition and Other Related Materials.

In line with that policy of transparency, in 2015 Senegal submitted its initial report on its implementation of the Arms Trade Treaty and its 2015 report on its implementation of the Programme of Action on Small Arms and the International Tracing Instrument.

Clearly, the major challenge in conventional arms control is ensuring that transfers of small arms and light weapons are transparent to avoid misappropriation. That situation is of most concern to West African States, notwithstanding the threat posed by other conventional arms.

The establishment of the United Nations Register of Conventional Arms constitutes an important step forward in the promotion of transparency in military matters, but the continuing operation of the Register should be reviewed in order to secure a Register that is capable of attracting the widest possible participation.

Such a review of the Register has revealed significant weaknesses that result from the exclusion of illegal small arms and light weapons, which pose a greater threat to African States because of their porous borders and political instability.

Given the evidence provided in connection with the general observation that such arms must urgently be included in the Register, Countries of the South must be supported in their efforts to improve transparency and build capacity to combat the illicit proliferation of and trafficking in firearms and their parts, components and ammunition.

Senegal has no weapons of mass destruction. The control of such weapons, however, should be strengthened in producing countries, particularly those that produce dual-use items.
